

Lab Reorganization in Apr. 2009

Accelerator Laboratory

The Accelerator Laboratory is responsible for the design, construction and operation of leading-edge particle accelerators which form the foundation of all scientific research carried out at KEK. Research activities encompass large-scale accelerators used in collaborative experiments, as well as specialized accelerator development. For details, please visit [the Accelerator Laboratory home page](#).

Organization

Director: Katsunobu Oide

Div.Head Accelerator Div. I	: Hitoshi Kobayashi) J-PARC
Accelerator Div. II	: Tadashi Koseki	
Accelerator Div. III	: Kazunori Akai) KEKB Ring
Accelerator Div. IV	: Haruyo Koiso	
Accelerator Div. V	: Atsushi Enomoto	
Accelerator Div. VI	: Seiya Yamaguchi	e+/e- Linac for KEKB/PF/PF-AR
Accelerator Div. VII	: Yukinori Kobayashi	ILC R&D PF/PF-AR/cERL R&D

Office: 029-864-5205

FAX: 029-864-3182

Situation around SuperKEKB

- SuperKEKB needs 390 M\$ (1\$ = 90 yen) with the nano-beam scheme. It was reduced from 560 M\$ with the high-current scheme.
- About 28 M\$ was allocated in JFY2009 for “low emittance accelerator”. It was once suspended by the new government in Sept. 2009, but released again in October, without any cut of amount.
- About 6.4 M\$ was allocated for the damping ring as “Strengthening of KEKB” in JFY2010.
- Budget for the running cost of KEKB was about 55 M\$ in JFY2009, but reduced to 49 M\$. The decrement corresponds to the damping ring budget.
- You should hear from A. Suzuki in detail.....

Issue of Human Resources

FTE

About 22 more FTEs are required for KEKB Ring upgrade.
